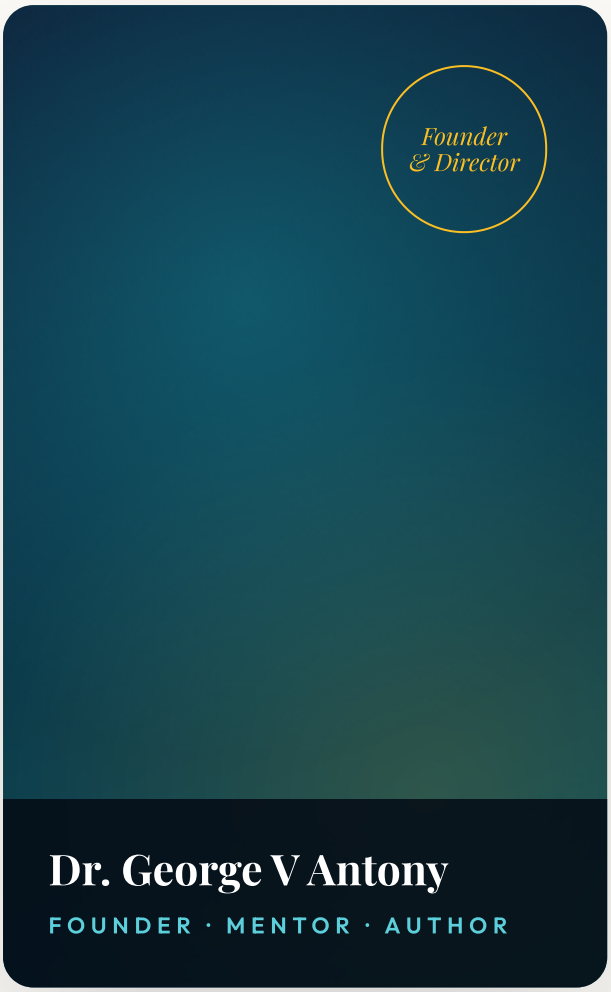
QUICK READ

Our work, in short.

We engage as strategic partners, bringing structured thinking, objective perspective and execution focus.

From boards charting strategy to founders shaping the next phase, our role extends beyond advisory — we act as trusted partners in decision-making and transformation.



FROM THE FOUNDER

A note on **why** *we do this work.*

Across nearly three decades of working alongside boards, founders, and institutions, one observation has stayed with me: the gap between a good idea and a lasting outcome is rarely closed by strategy alone. It is closed by clarity of thought, quality of decisions, and the discipline to execute through difficulty.

GreenApple Success Factors exists to help leaders close that gap. Whether it is a family-led enterprise charting succession, a first-time founder navigating early scale, or an institution rethinking its place in a changing world — our role is to bring perspective, structure, and a steady partner through critical inflection points.

We treat every engagement as a relationship rather than a transaction. We listen first, challenge respectfully, and stay close to the work until results are visible and durable. The pages that follow set out our practices and philosophy — but the heart of what we do is always the same: to enable people and organisations to think beyond the obvious, act with clarity, and create lasting impact.
